

# H7 10" PRO-BEAM SUPER-WIDE EQUIPMENT

## STANDARD CONFIGURATION SPECS

THESE ARE THE DEFAULT SPECS THAT ARE INCLUDED IN THE BASE CONFIGURATION OF THIS MODEL.

|                                                                                                                    |                                                                                                                                         |                                                                                                                                                                                    |
|--------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  Deck Width: <b>102"</b>           |  Deck Height: <b>28"</b>                               |  Axles: <b>Tandem (2 x 10,000 lbs.)</b>                                                          |
|  Length: <b>20' - 40'</b>          |  Couplers: <b>Bumper Pull, Gooseneck, &amp; Pintle</b> |  Load Capacity: <b>12,000 - 16,600 lbs.</b>                                                      |
|  GVWR: <b>20,000 - 23,000 lbs.</b> |  Weight: <b>5,280 - 6,240 lbs.</b>                     |  Choose the Monster Ramps, HD Ramps, or Blackwood Pro Decking for enhanced loading of equipment. |

Our oil bath lubrication system and Valcrum Oil Caps simplify axle maintenance by keeping them properly lubricated and allowing for easy oil level checks without worrying about broken plastic caps.

### OIL BATH AXLES WITH VALCRUM OIL CAPS

Choose the optional Monster Ramps to experience exceptional strength and loading flexibility, accommodating a wide range of equipment and vehicles.

### MONSTER RAMP (OPTIONAL)

Our Torsion Drop Axles effectively minimize deck height while utilizing a 10" frame beam, creating a more accessible loading surface for vehicles and equipment without compromising structural integrity.

### LOW DECK HEIGHT SOLUTION

Enjoy the robust 10" I-Beam frame design coupled with Drive Over Fenders (Shown) and a super-wide bed, delivering a spacious and stable platform for transporting vehicles and equipment with confidence and ease.

### SPACIOUS & STURDY DESIGN
